**DECORATIVE
STAMP
CONCRETE
FLOOR**

C A T A L O G U E 2 0 1 5

Flexstone is a decorative concrete system with a unique technology developed in India by a group of young and driven entrepreneurs. Understanding the need of the designers & the evolution of the construction industry, a new culture, “Cladding Culture” is developed by Flex Stone Inc.

Inspired by nature and its splendid beauty, FlexStone offers a wide range of modern and classical cladding options. These are the result of our continuous innovation through research and product development.

Stamped concrete, also referred to as imprinted concrete, textured or embossed concrete, is concrete that has been made to look like another material such as rock, cobblestone, tile, slate, brick or wood.

Stamped concrete has been around for many decades and is found on driveways, pool decks, entryways, patios, courtyards, and walkways, both commercial and residential properties. FlexStone takes this proven technology one step ahead with its 5 step methodology, which enhances the aesthetic look of the floor with its unique shadow impact technique.

TRENDS

Decorative Stamp Concrete Floor is created by using super strong concrete mix which is then stamped with specialised textured mats to create a surface texture that resembles natural stone, brick, paving or other variants. Decorative Stamp Concrete Floor is non-porous, impermeable and off which stains can easily be cleaned. The colours are UV stable and the colour hardener with sealer, keeps the surface intact for a long period of time.

GARDEN STONE

No. ITB-001 (106 x 106 cm)

EUROPEAN FAN STONE

No. ITB-003 (66 x 117 cm)

ASHLAR STONE

No. ITB-007 (61 x 61 cm)

RANDOM BLUE STONE

No. ITB-008

HERRINGBONE STAMP

No. ITB-009 (81 x 91 cm)
